Sturdier, more economical and useful trees with Augustine Ascending Elms

Here is what a city park forester recently wrote concerning the 800 Augustine Ascending Elms planted in his city: "All in all I can say that this is a very satisfactory tree for street and boulevard planting and I am planning on using more of them this fall where block planting is required."

There are about 50,000 individuals of this new elm population now growing in more than 200 wide-spread communities. Why this popularity? The answer lies in the tree's **health and economy**

(neat, vertical, rising lines • perfect reproduction • unusually rapid growth • no storm damage • healthy resistance to tree plagues • grass grows around base • neat and strong root habits • no traffic obstruction)

and its **usefulness**

(enclosure and boundary rows • highway and avenue • city parkways • landscaping • cemeteries • country clubs • campus, institution and factory grounds).

The Augustine Ascending Elm is guaranteed. This Association has every reason to believe that the new tree it offers has strong resistance to elm disease. Tests conducted by scientists lead to this conviction. The experience of thousands of satisfied people who have planted these trees and reported on their progress is further support. Every Augustine Ascending Elm already owned or henceforth purchased which dies within five years through the agency of any virus or fungus will be replaced by another tree. This guarantee covers Augustine Ascending Elms planted to replace other elms which have died from any cause.

The picture below is typical of young, healthy elms for lining out first offered this fall. Each is produced by careful grafting from controlled wood. Tags guaranteeing their genuineness and identity accompany each shipment. Plant a good number of these remarkable elms and the roots will start growing even during winter to support the rich foliage they will put out next spring. In record time you will have beautiful, strong trees like that shown to the right. Write today for a quotation on 50 or more trees for growing on. You will realize an unusual saving.

Quotations also on two, three and four-year-old trees given on request.

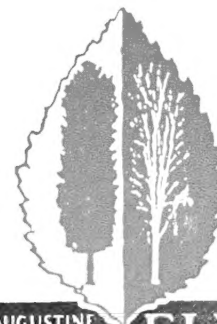

Get the facts. A new illustrated folder will give you interesting and valuable details about the uses, distribution, rate of growth, testimonies, and special features of this new Elm. Write for your copy today.
